

1 Sports Videography Budget Breakdown

***These factors are external to XI productions and must source independently. For an expectation of how much these factors would be, please check the attached PDF below this file**

2 Costs Per Day Shoot

1. 8-hour 1 day shoot

Casts + Basic Change + Location + Equipment + Service Fees

2. 8-hour 2 days shoot

(Casts x2) + (Basic Change + Extra Day) + (Location x2)

Equipment x (100%+30%) + Service Fees

3 Considerations

1. Agents

If there is an agent, payment would be coming from the company that the agent liases under, in which a meeting must be made with their financial department to agree upon a price.

2. Risks of Injury

The risk of injury in sports is high, and it might happen even on set. To mitigate this, more budget might be allocated to provide necessities, like water, snacks etc.
